

Hardik Rastogi

☎ +91-7505530087 | ✉ hardik.rastogi8118@gmail.com | 💻 hardikrastogi0087 | 🌐 hardikrastogi

Skills

Languages: Python, Java, JavaScript, TypeScript, C++, SQL

Frontend: React, Redux, Zustand, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Spring Boot, FastAPI, REST APIs, GraphQL

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis, SQLite

AI / ML & Data: LLM & GenAI Integration, RAG, Prompt Engineering, scikit-learn, Pandas, NLP (NLTK)

Cloud & DevOps: Git, GitHub, Docker, CI/CD, AWS (EC2, S3), Linux

CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, System Design

EXPERIENCE

Formora - Dynamic Form Builder

Feb 2026 – Present

Open-Source Package Manager

Remote

- Directed architecture and delivery of an open-source, schema-driven form-building platform shipped as versioned npm packages (@hardikrastogi/core, react, builder) with a Next.js documentation site, live playground, and a drag-and-drop visual builder.
- Designed a JSON-first schema (Zod-validated) as the single source of truth driving live rendering, dual client/server validation, token-based theming, and a plugin architecture supporting 13 field types.
- Directed testing (70+ Vitest/Testing Library unit tests, 50+ Playwright end-to-end tests, automated axe-core accessibility audits) and the release pipeline (pnpm workspaces, Turborepo, Changesets) publishing versioned packages to npm and deploying to Vercel.

Baxus – Whisky Price Comparison Extension

Oct 2025

React, TypeScript, Chrome Manifest V3, Vite, Tailwind CSS

Remote

- Chrome extension that scrapes bottle name, price, and spirit type from **4 whisky/wine sites** (Sotheby's, ReserveBar, Unicorn Auctions, Wine-Searcher) and finds the same bottles on the **BAXUS marketplace**, showing where they are cheaper.
- Architected around per-site content scripts, a background service worker, and a React popup communicating via Chrome message passing, with a **weighted fuzzy-matching algorithm** that pairs scraped product names with marketplace listings.
- Extended it with **live price comparison** (savings per match, cheapest first), paginated search across **5,000 listings**, and locale-aware price parsing; removed an obfuscated supply-chain backdoor from the build config.

Projects

AI-Powered Document Q&A Assistant (RAG) | React, FastAPI, Python, FAISS, PostgreSQL, Docker

2026

- Built and deployed a full-stack, multi-user RAG platform (React, FastAPI, FAISS) letting users upload PDFs and receive grounded, source-cited answers; live on Render and Vercel.
- Designed a persistent PostgreSQL schema (users, chats, messages, documents) for ChatGPT-style chat history, so users resume past conversations across 100+ chunks without re-uploading files.
- Engineered a hallucination guard via empirical distance tuning (0.95 cutoff; relevant ~0.85 vs. irrelevant ~1.05 avg. distance), plus grounded prompting with inline [Source N] citations.

Full-Stack Social Media Platform | Next.js, NestJS, PostgreSQL, Prisma, Redis, Socket.io, WebRTC

2026

- Built and shipped a full-stack Instagram-style social platform (Next.js 16/React frontend, NestJS/Prisma backend) with posts, stories, real-time direct messaging, and WebRTC-based video/audio calling.
- Designed a privacy-aware access-control layer (public/private accounts, follow-approval workflow) enforced across the feed, explore, and post-detail APIs, plus Redis-backed feed caching with automatic invalidation; verified with automated Playwright end-to-end tests.

Scalable E-Commerce Backend API | Java, Spring Boot, PostgreSQL, Redis, JWT, JUnit, Docker

2025

- Built a modular REST backend for product catalog, cart, and order management with JWT authentication, pagination, and input validation.
- Introduced Redis caching and covered core services with JUnit tests, reducing average API response time by ~40%.

Education

KIET Group of Institutions

B.Tech, Electrical & Electronics Engineering

Courses: Power System, DSA, OOPS, DBMS

Ghaziabad, India

Aug 2022 – 2026
